About me

I am a data scientist and researcher with a strong background in artificial intelligence, statistics, and mathematics. I hold a Bachelor's degree in Statistics and a Master's degree in Logic, Computation, and AI. I am currently a researcher at the University of Seville, working on the REXASI-PRO European project, as well as a PhD student focusing on the intersection between AI and topological data analysis. With over three years experience in data science and artificial intelligence, I am passionate about leveraging AI for impactful applications in fields such as medicine. I am committed to staying at the forefront of innovation and continuous learning in order to contribute to scientific and technological progress.

Work Experience

12/2023 - now **Researcher.** Department of Applied Mathematics I, University of Seville. Pre-doctoral researcher under the European project REXASI-PRO (HORIZON-CL4-HUMAN-01). My role focuses on optimizing energy consumption in machine learning models for pedestrian detection through topology-based methods, reducing input data while preserving performance. I also work on optimizing robot fleet behavior using explainable models to enhance reliability and predict secure wheelchair routes(WP6). Additionally, I contribute to the project's dissemination and communication efforts as part of WP8.

04/2025 - 06/2025 **Research Stay.** AIDOS Lab, University of Fribourg, between April 06 and June 06, 2025 visiting Prof. Dr. Bastian Rieck's team. Main objective was to use Topological Machine Learning techniques in the context of computational healthcare, more specifically in predicting the response of treatment to lung cancer.

10/2024 - 10/2024 **Research Stay.** Consiglio Nazionale delle Ricerche, Istituto di Elettronica e di Ingegneria dell'Informazione e delle Telecomunicazioni (CNR-IEIIT, Genova), between October 01 and October 31, 2024 visiting Maurizio Mongelli's team. Main objective was to mix both fields, Topological Data Analysis and Explainable Artificial Intelligence.

12/2022 - 12/2023 **Data Scientist.** Glucube (Previously named Igluco Tech). My role focuses on the development of deep learning models for blood glucose prediction for a non-invansive device. I also worked on data analysis and creating reports and visualizations.

09/2022 - 12/2022 **Software Developer.** Solera. Software and test development in Java and Python

01/2022 - 03/2022 **Data Scientist.** FISEVI. My role focuses on the development of data analysis for clinical data, including data import, data cleaning and data debugging, applying statistical techniques. Also developing an automated library for time saving and also in the production of reports.

Education

2024 – now **PhD in Mathematics and AI**, University of Seville. Research line: Topological Data Analysis for Trustworthy AI.

Education (continued)

06/2025 **Statistical Optimal Transport** summer graduate workshop, Simons Laufer Mathematical Sciences Institute (SLMath), between June 09 and June 20, in Berkeley, California. Granted by SLMath.

2022 – 2023 **Master's Degree in Logic, Computation and Artificial Intelligence.** University of Seville. Thesis title: *Applications of artificial intelligence in predicting blood glucose levels using non-invasive techniques.*

2018 – 2022 **Bachelor's Degree in Statistics.** University of Seville
Thesis title: *Statistical indicators associated to the living conditions survey.*

Skills

Engineering Machine Learning algorithms (e.g., decision trees), Deep Learning algorithms (e.g., neural networks), mathematical analysis, statistical methods, cleaning, and debugging data.

Languages Python, R, Java, Javascript.

Tools Tensorflow, Keras, Pytorch, Dash, Git, Shiny, VScode, Jupyter, Excel, SPSS, LaTeX.

Databases MySQL, PostgreSQL.

Languages

Spanish Native.

English Overall B2 Listening C Reading B2 Writting B2 Speaking B2.

Achievements

Participation in "II Jornadas de Topología de Datos" (TDA2025) with a talk titled "Interpolation and Function Approximation Using Neural Networks and Barycentric Coordinates". Certificate.

Seminar titled "Topological Data Analysis for data analysis and AI in robotics" in Scuola di Robotica, Genova. Certificate.

Participation in the Centre for Topological Data Analysis 2024 conference, organized by the University of Oxford. A poster titled "Representative measure approach to assess decision trees reliability" was presented.

Participation in The 2nd World Conference on eXplainable Artificial Intelligence. Oral presentation on the paper published in this conference [3], and in consortium with poster.

Participation in the GATMAID EMS Summer School, organized by the Centre de Recerca Matemàtica from June 25 to 29, 2024. A poster titled "Representative measure approach to assess decision trees reliability" was presented.

Participation in the ETSII Research Days (JIETSII 2024) with the talk titled "Topological Data Analysis for Trustworthy Artificial Intelligence".

NVIDIA DLI Certificate - "Fundamentals of Accelerated Data Science". Credential ID Jkg8E3DnSZu7hLnQfgBLDQ.

NVIDIA DLI Certificate - "Fundamentals of Deep Learning". Credential ID ToLN84tLTUKly-6eRmtGqA.

Research Projects

12/2023 – now **Researcher of the "REliable & eXplAinable Swarm Intelligence for People with Reduced mObility" european project (REXASI-PRO, GRANT AGREEMENT NO.101070028).** University of Seville.

Research Projects (continued)

02/2023 – 11/2024 **Member of the work team of the "Topología Computacional para el ahorro de energía y la optimización de métodos de aprendizaje profundo para alcanzar soluciones verdes de Inteligencia Artificial" project (TED2021-129438B-I00).** University of Seville.

Research Teams

2023 – now **Team member of the Combinatorial IMage Analysis research group.** University of Seville.

Publications
